1. Home Tab — Portfolio Command Center

OVERVIEW & NET WORTH

The **Home Tab** serves as the trader's command headquarters, displaying the active simulated net worth, 24-hour P&L metrics, and historical performance curves. It aggregates overall equity value across cash balances and open market holdings in real time.

- **Real-Time Net Worth:** Displays live equity fluctuations calculated directly from real and simulated market quotes.
- **Simulated Cash Sheet:** Includes the deposit drawer for topping up practice capital, which is now protected with a frosted lock card for Free members and fully unlocked for Pro and Max subscribers.
- **Persistent State:** Account info, virtual balances, and allocations are permanently saved in local storage and synced to Firestore, preventing unwanted balance resets on browser refreshes.

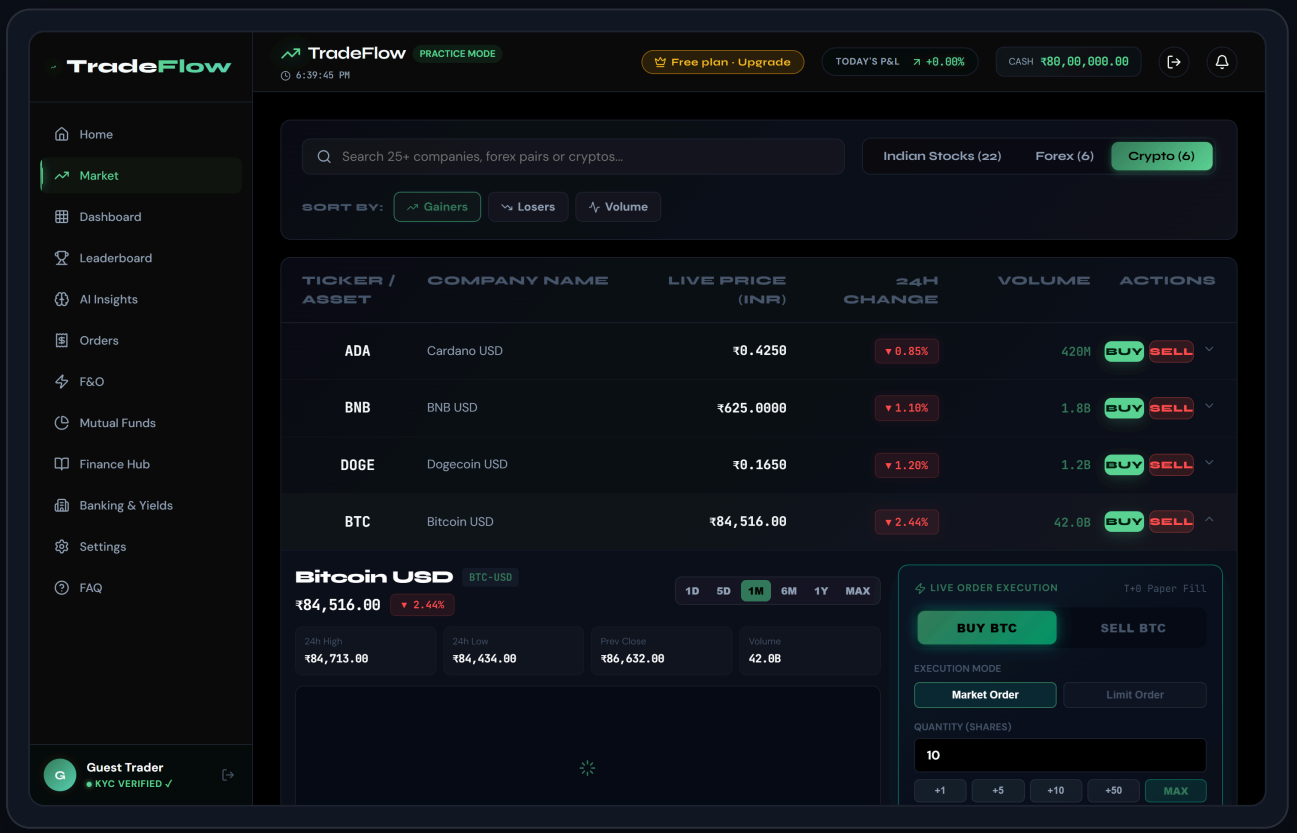

2. Market Tab — Unified Order Station & Advanced Charts

TRADING & TECHNICALS

The **Market Tab** is the core trading terminal, now rebuilt with 22+ top Indian equities (Reliance, TCS, HDFC Bank, Infosys, Bharti Airtel, L&T, Tata Motors, Sun Pharma, Zomato, and more) plus indices, crypto, and forex pairs.

- **Integrated Order Execution Station:** Replaces the old bottom-of-page placement with a modern, high-tech neon execution panel situated right beside the Candlestick Chart in the expanded asset view.
- **Dual Order Types:** Execute instant *Market* orders or precise *Limit* orders with automated order matching against live market movements.
- **Full Timeframe History:** Features comprehensive timeframe selectors (`1D` , `5D` , `1M` , `6M` , `1Y` , `MAX`) that load deep historical candlestick data without artificial bar truncations.

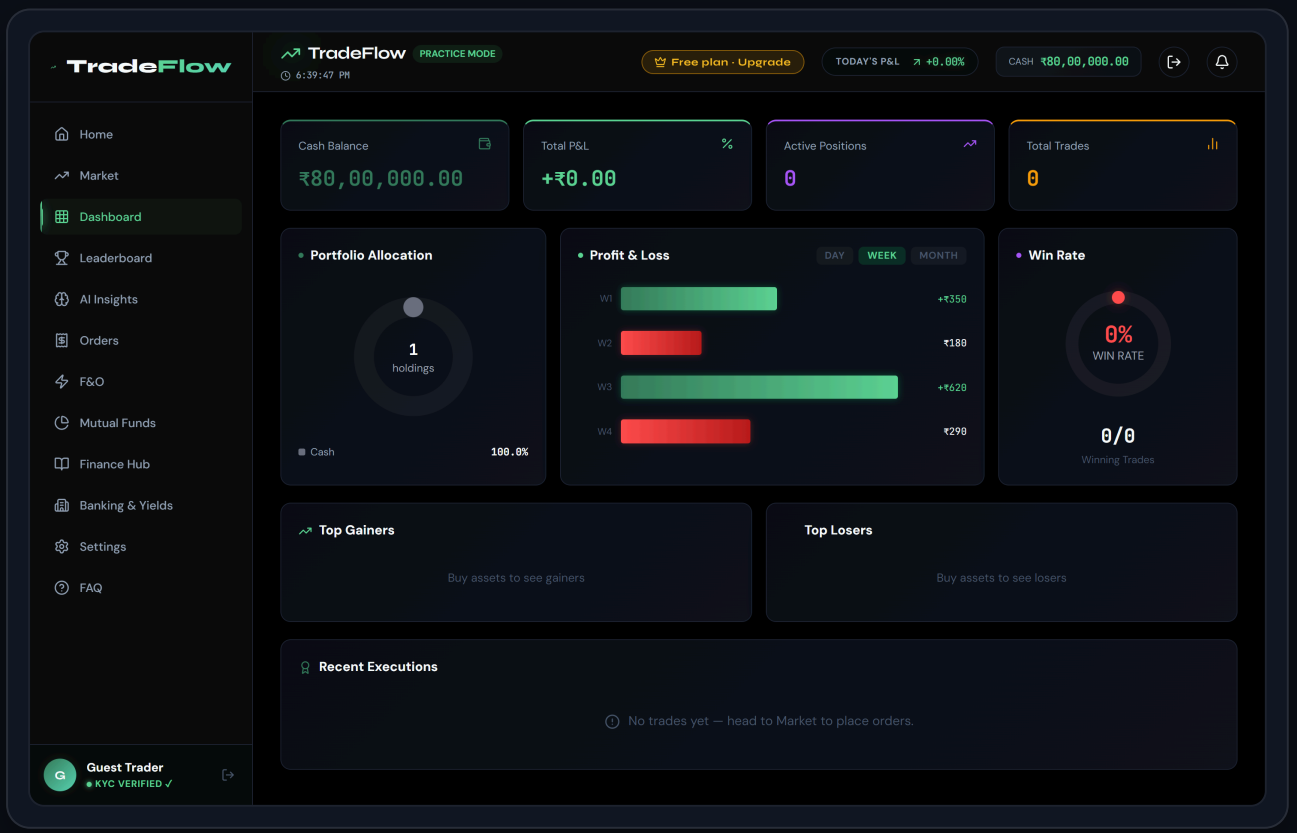

3. Dashboard Tab — Analytics & Asset Allocation

PORTFOLIO BREAKDOWN

The **Dashboard Tab** provides institutional-grade portfolio visualization and risk analytics, breaking down user capital into actionable visual insights.

- **Asset Allocation Doughnut:** Real-time breakdown of capital distribution across equities, derivatives, cash, and mutual funds.
- **Holding Concentration Metrics:** Highlights top exposures to prevent over-leverage or single-stock vulnerability.
- **Performance Velocity:** Tracks cumulative simulated returns and realized vs. unrealized gains over trading sessions.

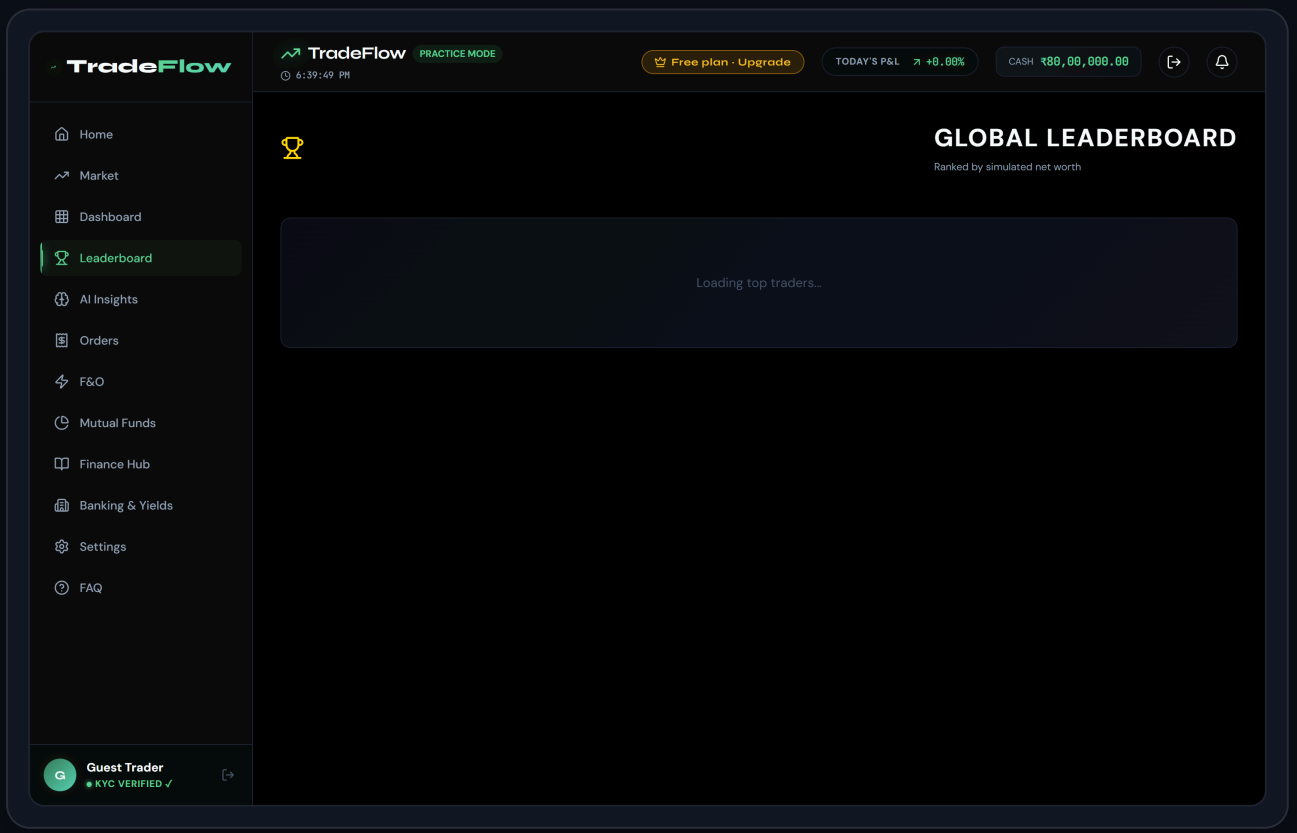

4. Leaderboard Tab — Competitive Ranking & Verifications

COMMUNITY & RANKS

The **Leaderboard Tab** introduces a competitive paper-trading arena where traders benchmark their strategy performance against peers.

- **Fair Play Verification:** Only organic trading accounts that have not deposited unranked top-up capital remain eligible for the public leaderboard.
- **ROI & Win-Rate Standings:** Displays top performers ranked by percentage return on simulated capital with verified badges.
- **Traders Showcase:** Transparent views of trading style, consistency score, and portfolio milestones.

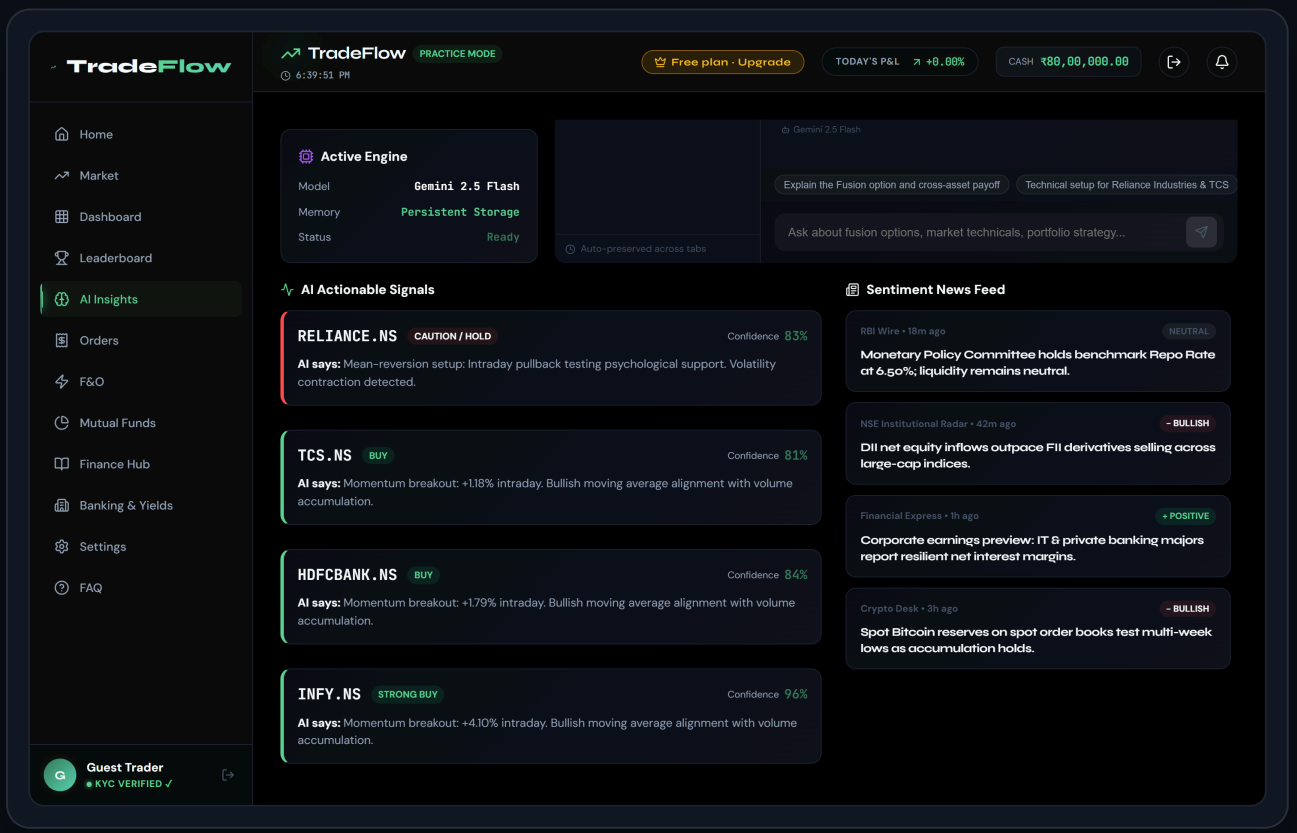

5. AI Insights Tab — Claude/ChatGPT-Style Quantitative Assistant

AI COPILOT & STRATEGY

The **AI Insights Tab** features an autonomous quantitative trading assistant with a complete Claude/ChatGPT-style left sidebar interface.

- **Persistent Session Sidebar:** Includes a "Chats and tasks" history drawer with a `+ New Chat` button. All previous prompts and conversation threads are saved permanently in local storage and never disappear when switching tabs or refreshing.
- **Deep Quantitative Knowledge:** Pre-programmed with specialized algorithmic knowledge on complex topics like *fusion options*, delta/gamma hedging, candlestick patterns, and SIP compounding.
- **1-Click Technical Prompts:** Fast prompt chips for immediate technical breakdowns of watchlist symbols.

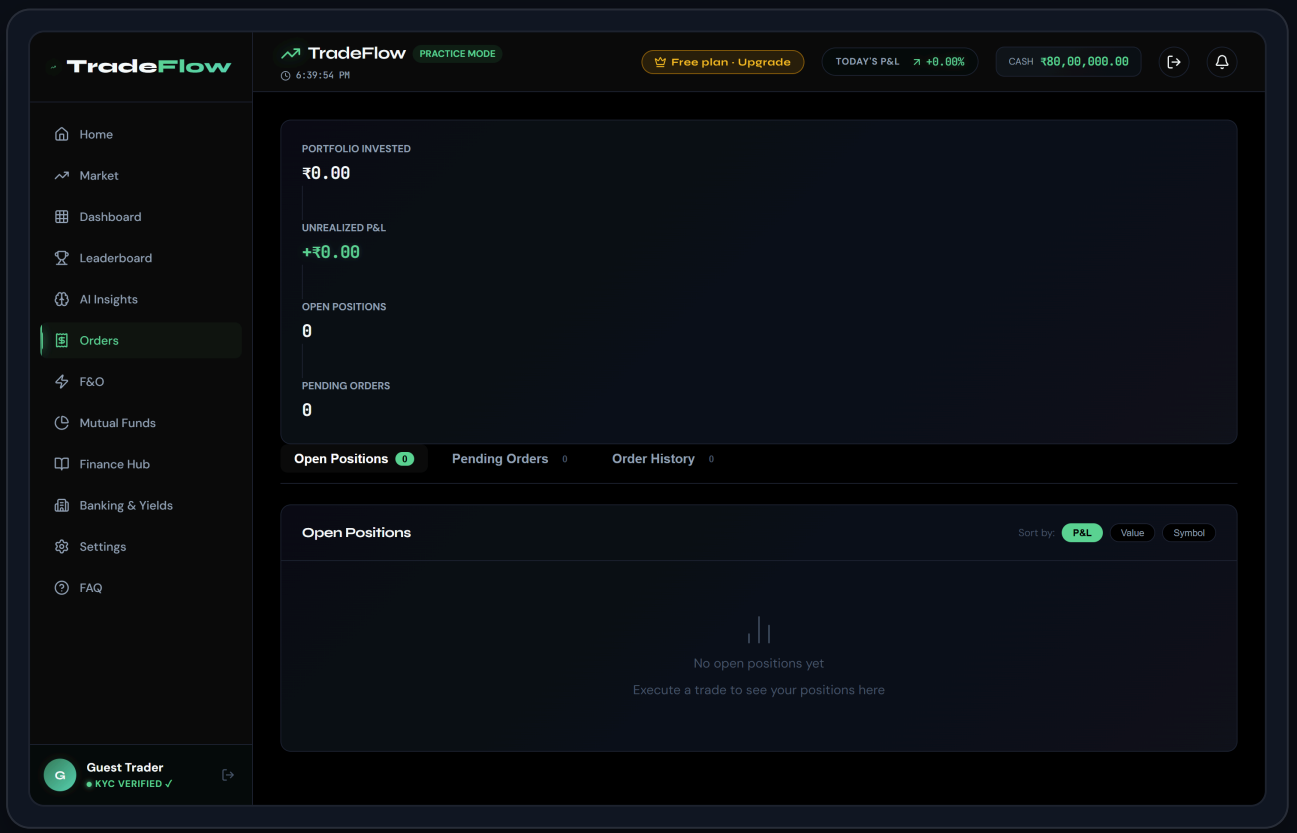

6. Orders Tab — Active Positions & Execution Book

ORDER MANAGEMENT

The **Orders Tab** maintains an audit log of all pending limit orders, filled market orders, and historical trade logs.

- **Open Limit Orders:** Real-time view of unexecuted orders with 1-click cancellation that immediately unreserves practice funds.
- **Filled Order History:** Timestamped execution history detailing executed quantities, filled prices, and realized profits/losses.
- **Share Retention:** Purchased shares (e.g. Reliance, TCS) are safely recorded and reflected across positions without disappearing on page reload.

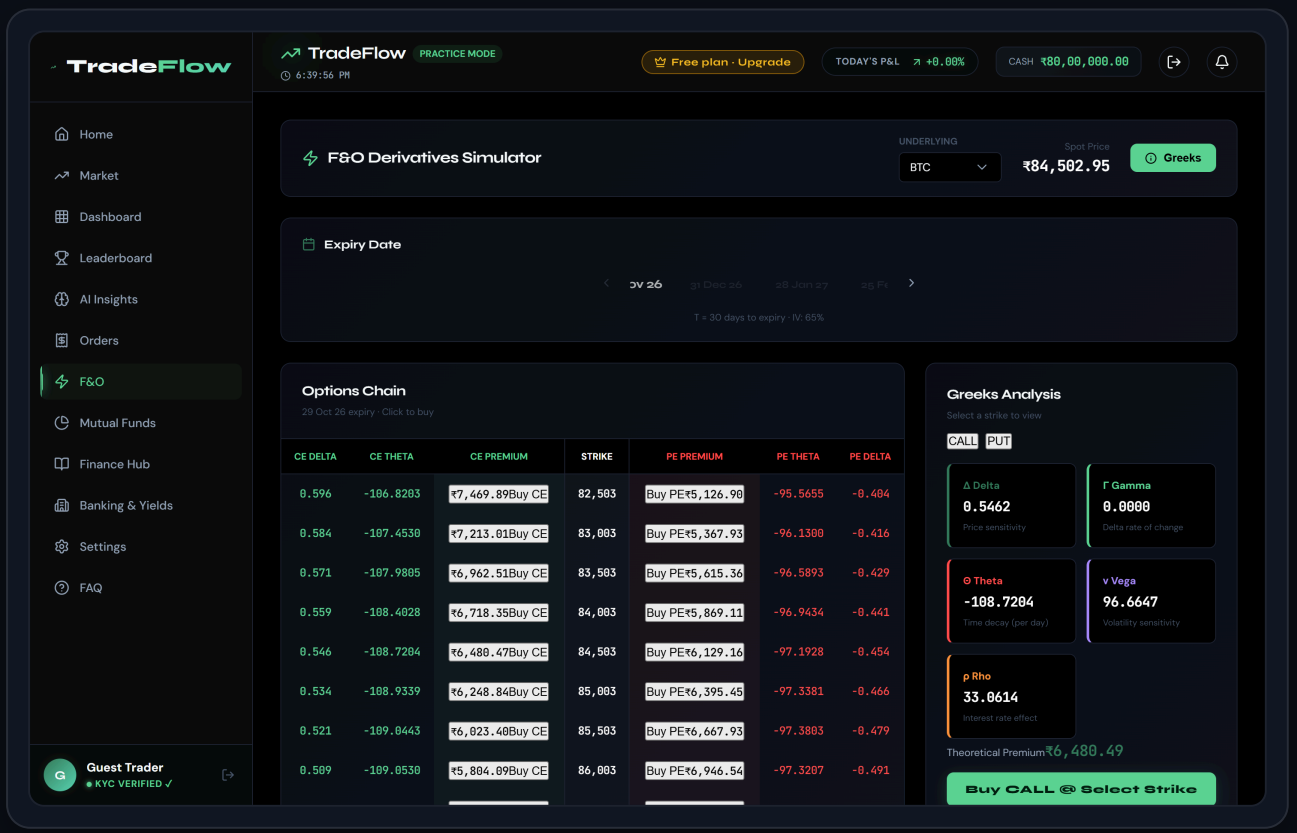

7. Futures & Options (F&O) Tab — Derivatives Terminal

DERIVATIVES & GREEKS

The **F&O Tab** provides a simulated derivatives trading floor designed for index options (NIFTY, BANKNIFTY) and high-liquidity stock contracts.

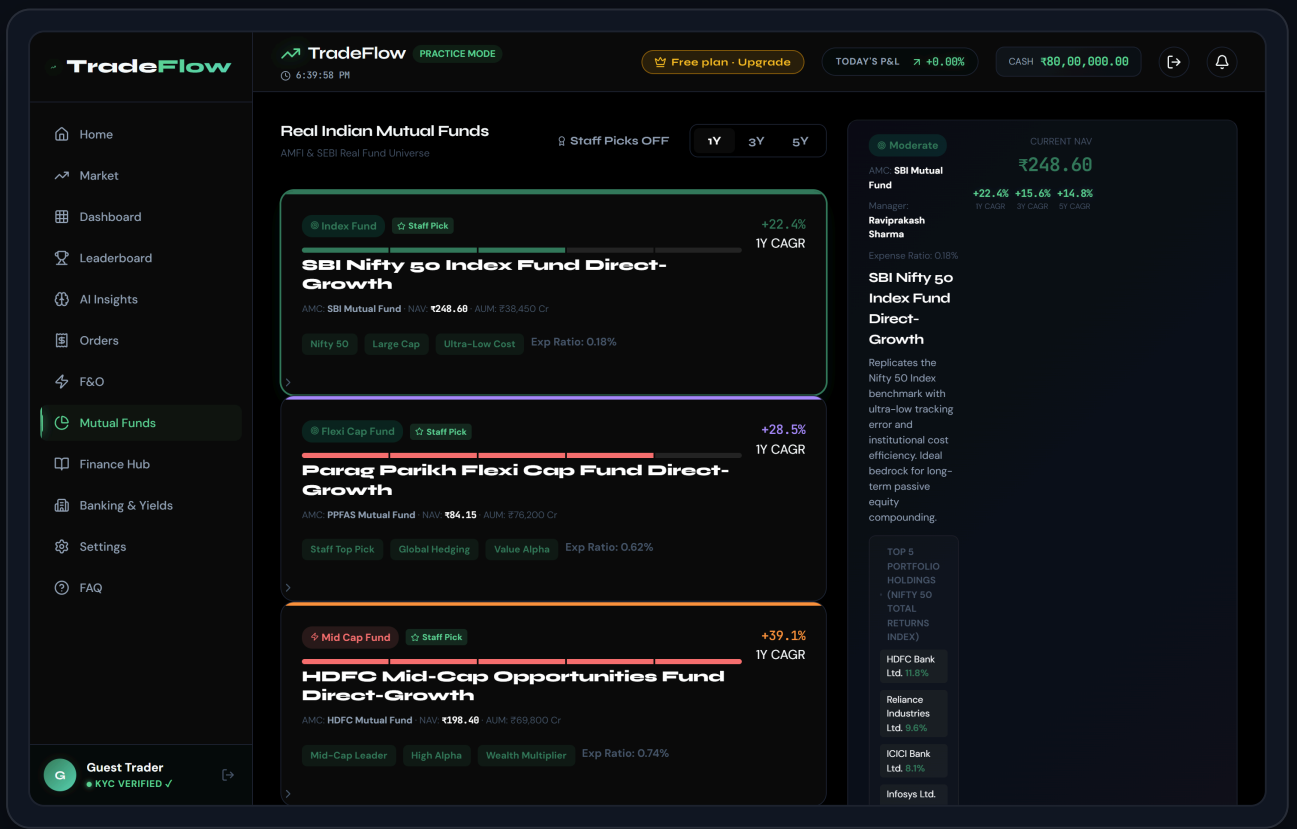

- **Option Chain Matrix:** Live calls and puts option chain with strike prices, premiums, implied volatility (IV), and open interest (OI).
- **Option Greeks Calculator:** Real-time estimation of Delta, Gamma, Theta, and Vega to help traders master time-decay dynamics.
- **KYC-Gated Access:** Requires simulated 1-click KYC compliance verification, which persists permanently across sessions without disruptive browser alerts.

8. Mutual Funds Tab — Authentic AMCs & Staff Picks WEALTH & SIP

The **Mutual Funds Tab** has been overhauled to replace mock AMCs with genuine Indian Asset Management Companies and verified scheme data.

- **Genuine AMCs:** Features verified schemes like SBI Nifty 50 Index Fund, Parag Parikh Flexi Cap Fund, HDFC Mid-Cap Opportunities, Nippon India Small Cap, and ICICI Prudential Equity & Debt.
- **50k Fixed Slider:** Corrected the monthly SIP slider range from 5k to ₹50,000 (`min={500}` , `max={50000}`), perfectly aligned with the visual labels.
- **Deep Fund Transparency:** Displays authentic NAVs in Rupee (`₹`) denominations, 3Y/5Y CAGR returns, fund managers, expense ratios, benchmarks, and top 5 portfolio holdings.
- **Staff Picks Mode:** A dedicated toggle showcasing handpicked high-conviction funds across risk appetites.

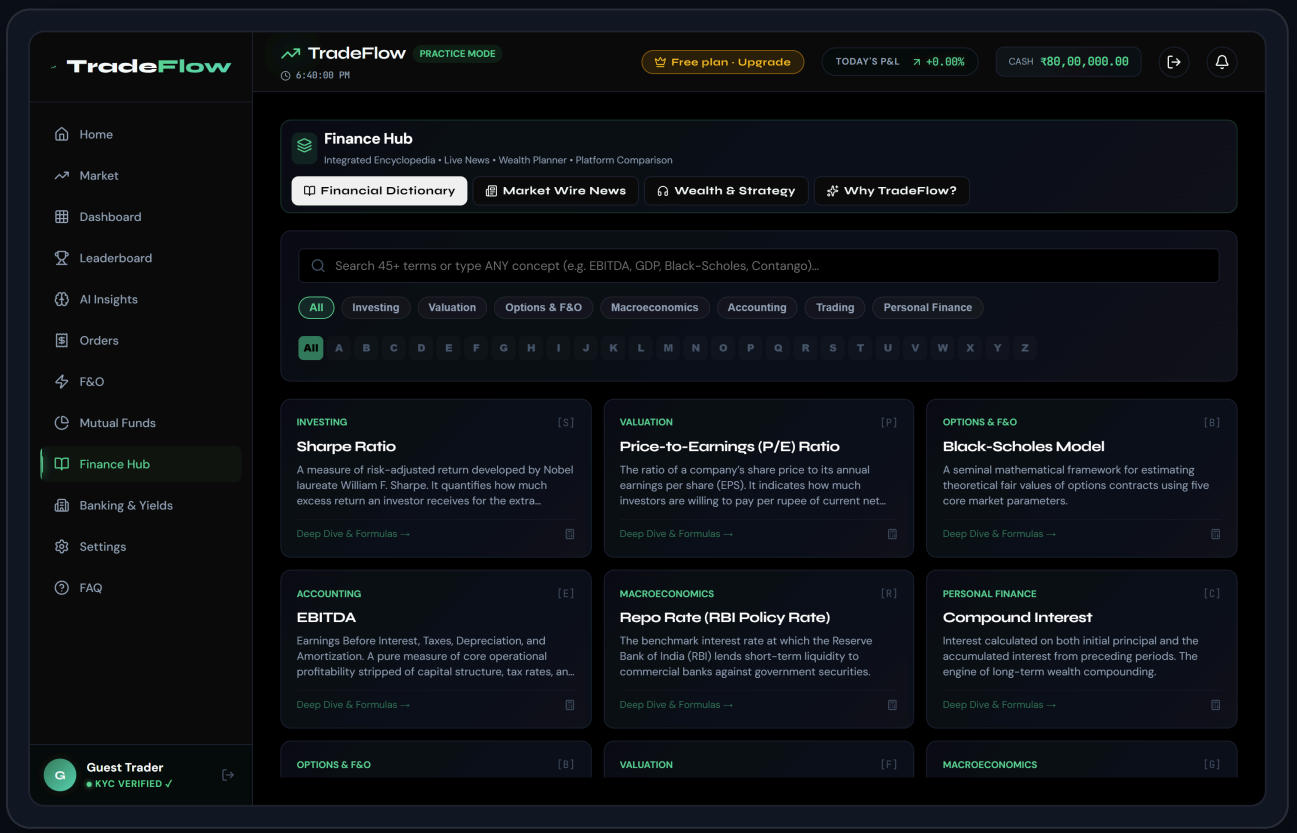

9. Finance Hub Tab — Financial Academy & Market News

EDUCATION & RESEARCH

The **Finance Hub Tab** combines learning resources and real-time market awareness for developing traders.

- **Interactive Financial Dictionary:** Comprehensive glossary covering trading terminology, technical indicators, and derivatives concepts.
- **Curated Market Feeds:** Live news and macroeconomic updates categorized by sector and sentiment.
- **Wealth Building Calculators:** Compound interest and long-term capital appreciation calculators for systematic wealth planning.

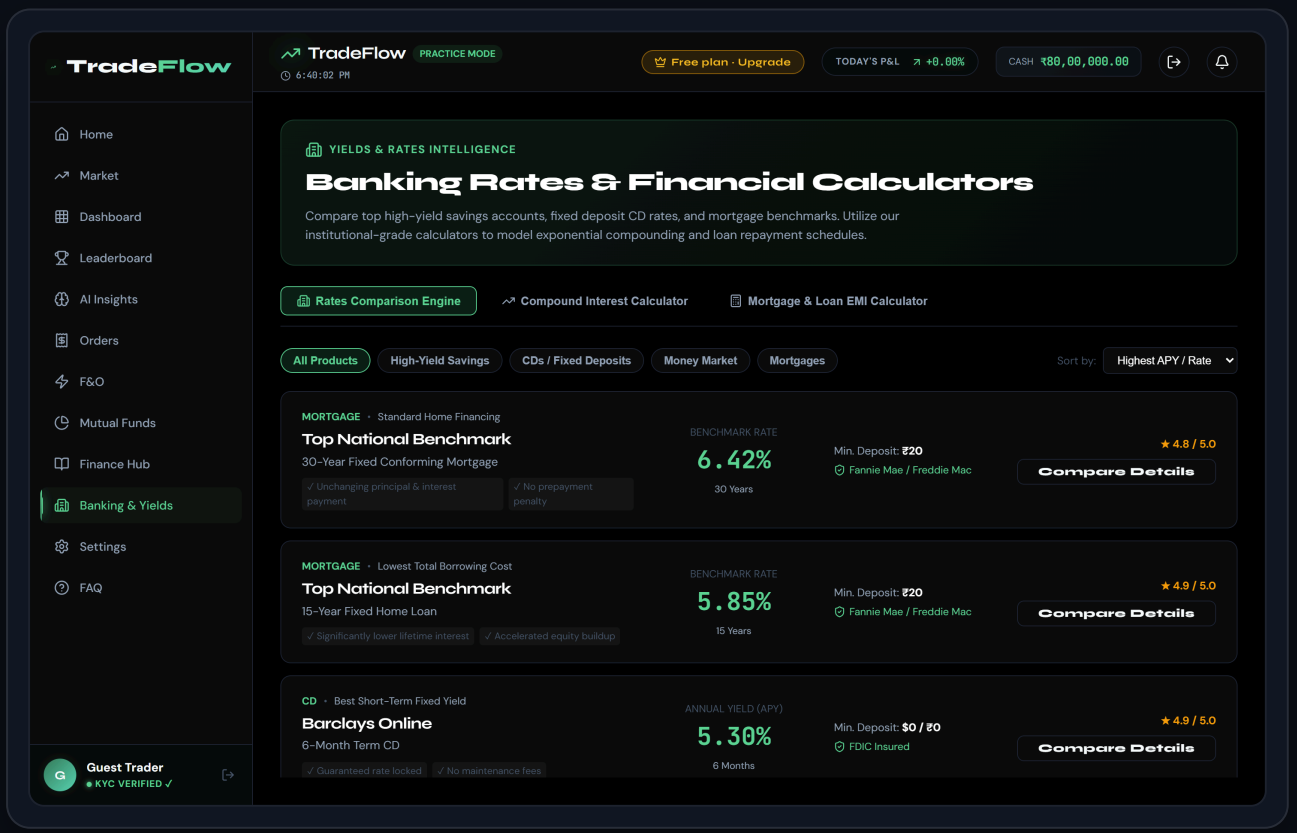

10. Banking & Yields Tab — Fixed Income & Treasury Rates

FIXED INCOME & MACRO

The **Banking & Yields Tab** provides institutional macro data across banking deposits and sovereign debt.

- **FD & Savings Yields:** Comparison matrix of fixed deposit interest rates across major public and private Indian banks.
- **Sovereign Yield Curves:** Tracking of 10-year government bond yields, repo rate benchmarks, and inflation gauges.
- **Cash Equivalent Insights:** Helps paper traders compare active stock market risk premiums against risk-free treasury yields.

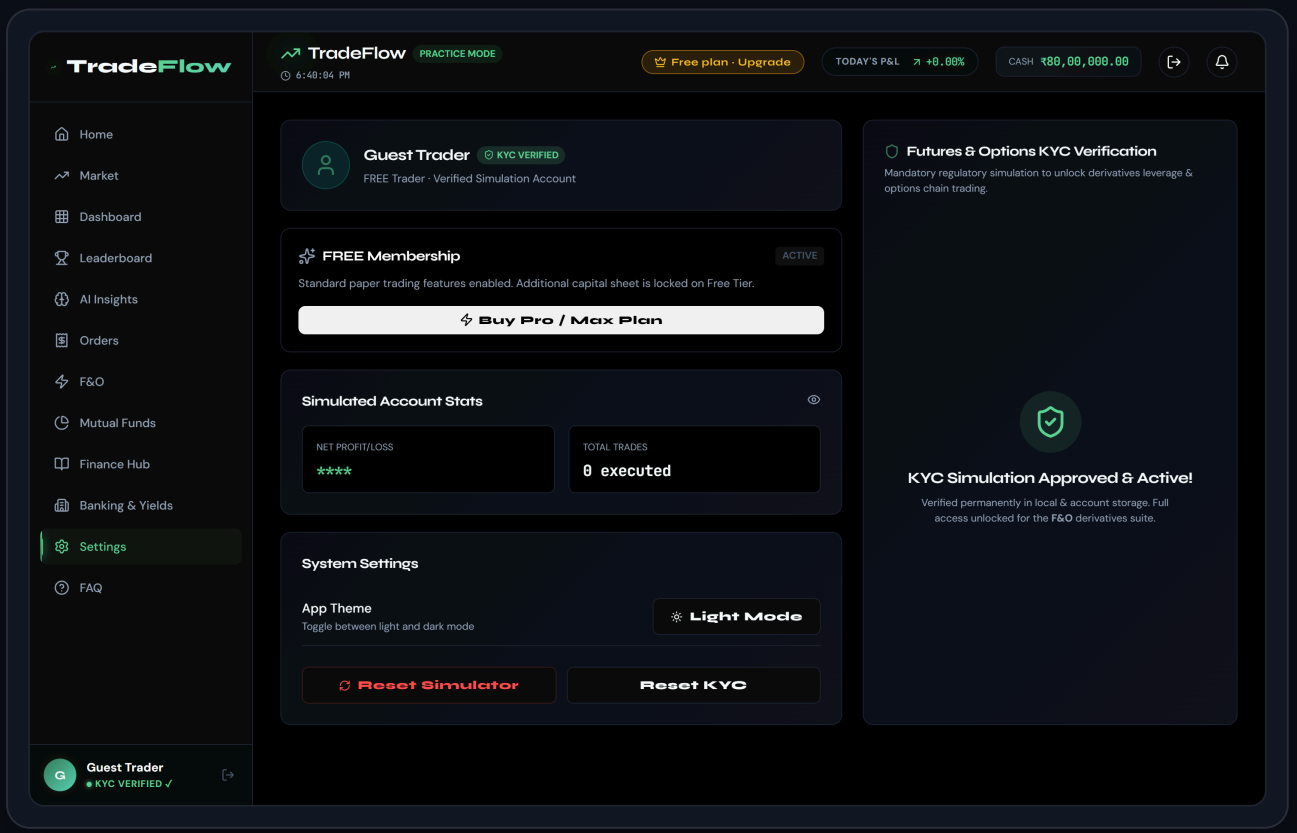

11. Settings Tab — Account Security & Tier Management

PREFERENCES & KYC

The **Settings Tab** delivers complete control over account credentials, identity compliance, and simulator preferences.

- **Permanent KYC Verification:** 1-click simulated KYC approval with instant visual status indicators that never reset on refresh.
- **Membership Tier Card:** Displays active subscription tier (Free, Pro, Max) with a direct "Buy Pro / Max Plan" upgrade button.
- **Clean Experience:** Elimination of disruptive browser alerts in favor of elegant, non-intrusive inline status banners.

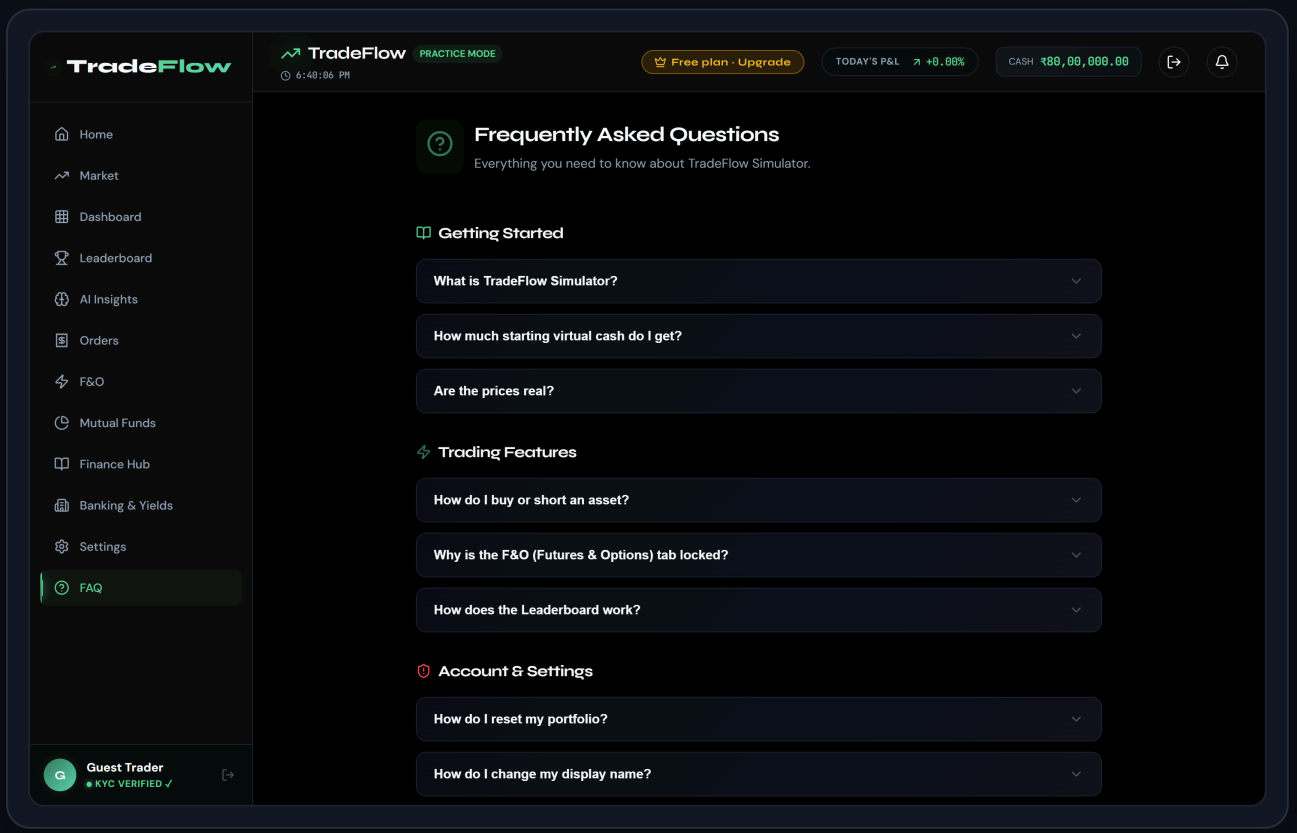

12. FAQ Tab — Knowledge Base & Simulator Guide

HELP & DOCUMENTATION

The **FAQ Tab** acts as the official user manual for TradeFlow, resolving common queries regarding simulator mechanics.

- **Platform Rules:** Transparent explanation of virtual practice cash limits, ranking eligibility, and order types.
- **Pricing & Tiers:** Clarification of features included in Free vs. Pro and Max memberships.
- **Troubleshooting:** Guidance on clearing local state, managing sessions, and trading during market hours.

13. Subscription Modal — Pro & Max Membership Tiers

PREMIUM MEMBERSHIP

The **Subscription Modal** unlocks advanced platform privileges, offering transparent pricing tiers tailored for serious market practitioners.

- **Free Plan (Active):** ₹80M starting practice cash, standard market data, basic AI prompts, and community leaderboard access.
- **Pro Plan (₹499/mo):** Unlocks the Additional Money Sheet to inject custom practice cash, advanced technical charts, priority AI queries, and custom watchlists.
- **Max Plan (₹999/mo):** Complete unlimited paper capital injections, instant F&O Greeks access, dedicated quantitative AI sessions, and zero-latency market feeds.
